DEVELOPMENT OF THE STATE TEACHERS COLLEGE

The State Teachers College at Salisbury was located on the Eastern Shore in response to a long-felt need for a teacher-training institution to care for the educational interests of the section. It has now been serving the people of Maryland since 1925 and is firmly established as an indispensable part of the State's public school system.

The school was authorized by the Legislature in 1922. The Building Commission, then created, selected for the location of the new institution a site containing twenty-nine acres, ideally located, near Salisbury. The school is now within the city limits, being included in the territory annexed by act of the Legislature of 1927. After initiating a building program and completing certain units of the college plant, the Commis-

sion went out of existence, and the rest of the building was done under the direction of the State Board of Education.

The college has developed into a center of educational activities, especially for the Eastern Shore.

LOCATION OF THE COLLEGE

Salisbury, chosen by the General Assembly of 1922 as the location for the needed new teacher-training institution, is a modern, progressive city, with cultured people who do their part to make life at the State Teachers College pleasant and profitable. Situated at the head of navigation on the Wicomico River, with hard surfaced highways radiating in every direction, Salisbury is easily accessible from all parts of Maryland. Its lakes and river give it a natural setting of rare beauty. Maryland's seaside resort, Ocean City, is only thirty miles away. Wilmington, Philadelphia, and Baltimore are within easy motoring distances. The Pennsylvania Railroad trunkline from New York to Norfolk and the South passes through Salisbury. De luxe buses run on regular schedule to all parts of the peninsula.

Residents of the Western Shore may select any of four routes to Salisbury: by train via Baltimore and Wilmington; by motor car via Baltimore; Elkton, Maryland; Middletown, Delaware; and Dover, Delaware; via Sandy Point-Matapeake ferry, thence by motor car or Red Star bus to Salisbury; by the Red Star Motor Bus, which furnishes through passenger service from Baltimore to Salisbury by way of the Matapeake ferry. Full details concerning schedules will be furnished upon request.

The College is located between Camden Avenue and Salisbury Boulevard at the junction of College and Camden Avenues. The grounds comprise attractive lawns, with flowers, trees, shrubbery, and evergreens, as well as ample playground areas and gardens. A distinctive feature is the athletic field, where training in all forms of sport is given.

THE COLLEGE PLANT

The entire group of buildings as originally planned is now in use, the final additions having been occupied in the fall of

1932. The buildings comprise the administration building, containing the auditorium, classrooms, gymnasium, offices, and dormitory rooms; the north wing and connecting wing, including the library, little theatre, and faculty offices; and the south wing and connecting wing, containing the social room, dining hall, service room, kitchen, infirmary, visual education room, and the dormitory rooms for students and guests. The laboratory school, comprising four classrooms, library, and teachers' offices, is at the rear of the north wing. The building plan is unique in that every facility is practically under one roof and may be reached without suffering exposure in inclement weather.

LIVING ACCOMMODATIONS

The State Teachers College at Salisbury has rooms for resident women students on the second and third floors of the north wing and on the third floor of the administration building. Baths and student's laundries are conveniently located, and each room has a lavatory with hot and cold running water. Each room accommodates two students. Young men students room in homes adjacent to the campus, and take their meals in the college dining hall. A limited number of dormitory rooms for young men have been provided in the south wing of the college building.

Students enjoy the comforts and conveniences of a social room and dining hall, which, in their decorations and furnishings, are superior to those found at most similar institutions. Every opportunity is afforded students to enjoy, under helpful and sympathetic guidance, approved social, moral, and religious surroundings.

ADMISSION REQUIREMENTS

1. GRADUATION FROM AN APPROVED HIGH SCHOOL:

   Graduation from a standard public high school or accredited nonpublic secondary school is required for entrance to the College.

2. RECOMMENDATION BY THE HIGH SCHOOL PRINCIPAL AND BY THE SUPERINTENDENT:

The recommendation of the principal of the high school from which the applicant has graduated and also the recommendation of the superintendent in whose area the school is located are required.

Graduates of nonpublic Maryland schools and out-of-State schools who are admitted must have the recommendation of the principal and must have completed a well-organized curriculum totaling 16 units and including the following constants required for graduation from any Maryland public high school:

Subject	*Units*
English	4
Mathematics	1
Social Sciences, of which 1 unit must be in United States History	2
Science	1
Acceptable electives	8
Total	16

3. SCHOLARSHIP:

The standards for students entering from Baltimore City and from the counties, though based on different marking systems, are approximately the same and are as follows:

County students—The scholarship standard set by the State Board of Education as the basis for certification by the high school principal for college entrance requires that the applicant shall have made a grade of A or B in at least 60 percent of the college entrance courses and a grade of C or higher in all other college entrance courses taken during the last two years of high school. Students not meeting this average may be considered for admission on the recommendation of the high school principal and of the superintendent of schools.

Baltimore City students—The agreement with the State Department of Education on the scholarship standards recommended by the Board of School Commissioners

of Baltimore City as the basis of certification for admission to the Teachers Colleges is that the student must have made an average of 80 percent in the last two years of high school work. Students with averages between 75 and 80 may be considered for admission on the recommendation of the high school principal and the superintendent of schools.

4. HEALTH:

A thorough physical examination by the College physician is required for admission.

5. CITIZENSHIP:

According to a By-law passed by the State Board of Education, only citizens of the United States shall be employed in the public school system in the counties or admitted to the State Teachers Colleges.

6. ADVANCED STANDING:

An applicant for advanced standing who presents a record of honorable dismissal from the college attended may be allowed credit for college work completed in so far as the work approximates courses offered at the Teachers College. No transfer credit will be allowed for courses in which the applicant has made D grades. The advanced standing is provisional until the student has established a satisfactory record in the College.

A transfer student must earn the last year of credit (thirty-two semester hours) at the Teachers College which awards the degree. If the applicant has graduated from a two- or three-year curriculum at one of the Maryland State Teachers Colleges the requirements may be reduced to not less than two summers of ten weeks each, or one semester. Summer school courses at the College may be counted toward the last year of the requirement for the degree.

7. TRANSFERS FROM ONE MARYLAND TEACHERS COLLEGE TO ANOTHER:

A properly qualified student may enter any one of the three Maryland Teachers Colleges, but, when a choice of

schools has been made, no transfer to another Maryland Teachers College shall be permitted under any conditions or at any time, except by written permission from the State Superintendent of Schools after the request for transfer has been acted on by the State Board of Education. A student who has failed in one or more courses will by that fact be debarred from obtaining a transfer.

THE PLEDGE TO TEACH IN THE STATE OF MARYLAND

Every student beginning the third year at the State Teachers College must have signed the pledge to teach two years in Maryland immediately following graduation. If only the last year's work is taken at the College, the pledge to teach shall cover one year.

REQUIREMENTS FOR THE DEGREE

To qualify for the degree of B.S. in Elementary Education, a student must earn credit for four full years of work, or 128 semester hours, including the following courses:

Subject	*Semester Hours*	
Art	6	6
Education:		
Educational Psychology	3	
Curriculum Materials and Methods	12	
History of Education	2	
Children's Literature	3	
Directed Teaching	16	
Psychology-General	3	
	—	39
English:		
English and American Literature	6	
Composition	6	
Elective (required)	6	
	—	18
Geography	6	6
Mathematics	3	3
Music	6	6
Physical and Health Education	9	9
Science: Physical and Biological Sciences	12	12
Social Sciences:		
History of Europe	6	
History of the United States	6	
Elective (required)	6	
	—	18
*Free Electives	11	11
Total		128

STANDARDS OF WORK

An average of "C" in the four years' work and a grade of "C" or more in directed teaching are required for graduation. No student will be graduated with an "F" semester grade in a required subject. Any student accumulating an "F" semester grade in twelve hours' work will be dropped.

STUDENT LOAD

Sixteen semester hours constitutes the normal student load for a semester and only upon approval of a faculty committtee may the student register for a heavier schedule. No student is permitted to carry more than eighteen hours in any one semester.

Ten semester hours constitutes the normal student load for a ten-week summer session and only upon approval of a faculty committee may a student register for as many as eleven or twelve semester hours.

EXPENSES**

Tuition for Maryland Students

A uniform fee of $100.00 for tuition for each academic year is charged transfer students at each of the State Teachers Colleges for white students. No tuition is charged students signing the pledge to teach two years following graduation. This amount includes the charges for registration and for health and laboratory services.

* Not more than 9 semester hours in electives will be allowed in any one subject.

** The fees and expenses for the 1947-49 years have not been finally determined. A revised schedule will be published at a later date.

Cost for Maryland Resident Students

The cost for a resident, transfer student for the regular academic year is $316—$216 for room and board, and $100 for tuition. No tuition is charged students signing the pledge to teach two years following graduation. All expenses are payable in two equal installments in advance, $158 on the opening day of each semester.

In addition to this, a $5.00 breakage fee is deposited by each new student. This is refunded when a student graduates or withdraws from the college, if there is no charge against his record.

A student activities fee of $10.00 is collected at the request of the student body and is payable at the time of the fall registration.

All women and a limited number of men resident students are required to live in the dormitories. Desirable rooming facilities for men students are also available in nearby homes. The resident cost is the same for men as for women. All resident students are subject to the disciplinary control of the College.

Cost for Out-of-State Students

Students who are not legal residents of Maryland and who meet the entrance requirements may be admitted. Such students pay all the fees charged Maryland students plus a surcharge of $200 per academic year.

Late Registration Fee

Any student who registers after the date of registration named in the calendar is required to pay a late entrance fee of $2.00.

The Breakage Fee

A breakage or property deposit of $5.00 is required of each student entering the college for the first time. This fee is refunded when the student graduates or withdraws, if he has no charges against his record. In addition to individual breakage charges, there are group losses and breakages which are prorated and charged to the students involved.

Transcript of Record

One transcript of a student's record will be issued free of charge. A charge of $1.00 is made for a second and each subsequent transcript.

Summary of Expenses

	Semester I	*Semester II*	
MARYLAND RESIDENTS:			
Tuition	$ 50.00*	$ 50.00*	
Board and room	108.00†	108.00†	
‡Athletic fee	10.00	.....	
Breakage fee, refundable—all freshmen or new students	5.00	.....	
Activities fee—agreed upon by students	10.00	.....	
Totals	$183.00	$158.00	$341.00‡
OUT-OF-STATE RESIDENTS:			
Surcharge in addition to fees shown above	$100.00	$100.00	

The Activities Fee

On registration day of each academic year every student is required to pay an activities fee of $10.00, and on registration day in the summer session an activities fee of $2.00. This money belongs to the student body and is used for class dues and for furthering such activities as student publications, athletics, dramatics, the band, the student government association, and for financing assembly programs. There will be no refund of the activities fee after the first two weeks following registration.

Men Students

Men who register as boarding students are given meals at the college. The college either provides in dormitory or rents for them desirable rooms in nearby homes where, after rigid inspection, conditions are found acceptable for comfortable and convenient living.

* Not charged teacher training enrollees.

† If a room reservation fee has been paid, deduct same from this amount.

‡ Textbooks available in bookstore.

REFUNDS

As a basis for making refunds to students who withdraw, the following plan is used:

DAY STUDENTS:

1. A day student who withdraws within two weeks of his initial enrollment shall have refunded the tuition charge for that semester less $10.00.
2. A day student who withdraws later than two weeks after the beginning of any semester or session shall receive no refund of tuition for the half-semester or half-session in which the withdrawal occurs.

RESIDENT STUDENTS:

1. A resident student who withdraws within two weeks of his initial enrollment shall have refunded the tuition charge for that semester (or whatever amount has been paid by the student) less $10.00; and shall have refunded also the amount paid for board and room minus the charge for one week in excess of his residence at the College.
2. A resident student who withdraws later than two weeks after the beginning of any semester or session shall receive no refund for the half-semester or half-session in which the withdrawal occurs and will be charged for room and board for one week in excess of his residence at the College.

WHAT STUDENTS SHOULD BRING WITH THEM

Every student must furnish the following for personal use: bedroom slippers with soft heels, toilet soaps, bureau scarfs, blotter for study table, blankets, a cover or spread for the bed, two laundry bags, two teaspoons, a drinking glass, and six all-white table napkins.

For purposes of economy and uniformity in appearance and quality of materials, the college requires all students to purchase regulation athletic uniforms. These are procured by the college, at a minimum cost to the student.

LABORATORY SCHOOL FACILITIES

The State Teachers College at Salisbury has, for its laboratories, one campus and several off-campus elementary and junior high schools. The campus elementary school gives instruction to elementary school children in all grades from one to seven, inclusive. Observation and participation by student teachers starts at the beginning of the junior year and continues throughout the year.

The off-campus schools, located in the cities of Salisbury and Princess Anne, likewise give instruction in all grades of the elementary and junior high school. As conditions warrant, other laboratory centers will be established in nearby towns. Student teaching in off-campus schools is done during the first semester of the senior year.

LOAN FUNDS

THE EDNA M. MARSHALL MEMORIAL FUND:

The Edna M. Marshall Memorial Fund was established in June, 1935, as a living tribute to the memory of Edna M. Marshall, Ph.D., Director of Training and Principal of the Campus Elementary School from 1925 to 1933. It may be used only by worthy junior and senior students, and is available to the extent of from $25 to $150 per year. It is administered by a board whose membership includes two alumni and two members of the college faculty.

OTHER FUNDS:

The Samuel Chase Chapter of the Daughters of the American Revolution makes it possible for a limited number of students to secure needed loans at a low rate of interest.

FOUR-YEAR CURRICULUM LEADING TO THE B.S. DEGREE IN EDUCATION

(The completion of the first two years of this curriculum with an average grade of "C" or better will enable a student to enter the two-year professional curriculum at the State Teachers College at Salisbury or to transfer, with junior standing, to most colleges and universities of Maryland and of other states.)

NOTE 1: Any other freshman or sophomore subject offered may be substituted provided it can be scheduled.

NOTE 2: Credit for any of the above listed subjects may be used in meeting the requirements of either the two or four year curriculum at the State Teachers College at Salisbury.

NOTE 3: Freshmen students desiring to transfer to Agriculture, Business Administration, Chemistry, Dentistry, Home Economics, Industrial Arts, Veterinary Medicine, or Nursing at the end of the first year with sophomore standing, should enroll for Chemistry 105-106, plus such courses as are necessary in the curriculum chosen.

NOTE 4: No student may be enrolled for more than 16 semester hours without the approval of the faculty committee.

* Pending approval.

DESCRIPTION OF COURSES

Art

Art 103, Mechanical Drawing.....MR. FLEMING, MISS PURNELL

2 double laboratory periods a week for 36 weeks. Semester credit, 4 hours.

This is a course in constructional and scale drawing, following engineering, architectural, and mechanical trends. It trains in skill, accuracy, and the proper use of mechanical tools.

Art 101, Appreciation.....MISS PURNELL

2 double laboratory periods a week for 18 weeks. Semester credit, 2 hours.

This is an introductory course to develop understanding, appreciation, and skill in self-expression. The rudiments of art are stressed.

Art 204, Fundamentals of Design.....MISS PURNELL

1 lecture and 2 double laboratory periods a week for 18 weeks. Semester credit, 3 hours.

The course comprises a study of the space arts from the point of view of balance, proportion, rhythm, and harmony, to develop an understanding of composition and design as expressed in several art materials.

Art 202, Crafts.....MISS PURNELL

2-3 double laboratory periods for 18 weeks. Semester credit, 2-3 hours.

The development of many types of handiwork and practice in the use of various materials are the aims of this course. Creative ability and ingenuity on the part of the student are prime assets.

Art 302, Costume Design.....MISS PURNELL

2-3 double laboratory periods a week for 18 weeks. Semester credit, 2-3 hours.

A study of the art of dress. Proper and suitable clothing for all types of people and the historical background of styles will be included.

Art 401, Fine and Industrial.....MISS PURNELL

1 lecture and 2 double laboratory periods a week for 18 weeks. Semester credit, 3 hours.

The objective of the course is to develop competence in art expression. To this end students are given practice in applying art principles to the everyday problems of home and community living. The evolution of representative art forms from primitive times to the present will be considered, so that students may gain a knowledge of this history of art and thereby develop interest and understanding of art in its relation to cultural values. Prerequisite, Art 202.

Education

Education 304, Curriculum Materials and Methods.....THE STAFF

Seminar, 10 hours a week for 18 weeks. Semester credit, 10 hours.

The child and his curriculum: An experience planned and directed by the entire staff to help prospective teachers see life in the school in its relation to the physical, mental, emotional, and social development of children of elementary school age.

The underlying principles of teaching and learning are developed through observation and participation in the work of the laboratory schools. Study of the activities of children is supplemented by reading and discussion. Experiences with children are interpreted in the light of scientific findings in child development.

Special consideration is given to the importance of the language arts. Observations are made at the various learning levels, in order to enable the students to study the development of skills and help them to understand the importance of reading and language in the curriculum.

This professional experience will be directed through three courses in teaching—Teaching Science; Teaching the Social Studies; Teaching Mathematics—and a practicum in art, music, or physical education instruction. These courses will be coordinated through two courses: Curriculum Interpretation I—Expression through the Language Arts; Curriculum Interpretation II—Expression through Constructive Activities and Instructional Materials.

or

Education 301, Art in the Elementary School.....MISS PURNELL

1 lecture and 2 double laboratory periods a week for 18 weeks. Semester credit, 3 hours.

This is a course to apply art techniques to the needs of all grade levels for the purpose of developing art activities as a means of motivating any grade subjects. Actual work and observation of the various grades are encouraged.

Education 303, Reading in the Elementary School.....DR. MATTHEWS

3 hours a week for 18 weeks. Semester credits, 3 hours.

The chief purposes of this course are to give students an appreciation of the values of reading, an understanding of the complex problems involved in teaching it at the varying levels in the elementary school, and a functional knowledge of the materials and techniques to use in helping children develop basic habits and skills in reading. Opportunity is given each student to study reading problems as they relate to actual learning situations in the laboratory school. Attention is given to recent experimentation in the field.

Education 305, Science in the Elementary and Junior High School
DR. FLEMING

3 hours a week for 18 weeks. Semester credit, 3 hours.

This course presents a survey of biology, chemistry, physics, and astronomy as needed in elementary and junior high school teaching. It also acquaints the student with courses of study in science and with materials and methods of science instruction.

Education 307, Social Studies in the Elementary School
MR. FLEMING, DR. THOMAS

3 hours a week for 18 weeks. Semester credit, 3 hours.

This course is planned to prepare students to teach those social studies which are required in the elementary school curriculum. To that end, much practice is given in the selection of subject matter for the various grades of the elementary and junior high school, and in the organization of that subject matter into appropriate units of work. Opportunity is also given for the observation of social studies classes in the elementary school. Students are urged to make collections of pictures, stories, and other illustrative materials in the field of elementary and junior high school social studies.

Education 302, 401, Directed Teaching.....DR. CARUTHERS, DR. MATTHEWS

15 hours a week for 36 weeks. Semester credit, 16 hours.

Students are placed in directed teaching centers on the campus or in nearby public school systems. They have opportunities to observe teaching, to participate in work with children, to teach in the elementary grades, and to participate in all other activities for which regularly employed teachers are responsible.

Besides participation and teaching, the work of the student teacher includes individual and group conferences with training teachers and supervisors. Guidance is given students in selecting materials, in organizing "units" for teaching purposes, and in interpreting them in terms of guiding children in the total educative process. Reasonable skill in teaching techniques is required of each student, and an effort is made to enable him to develop a teaching personality and an understanding of the principles of education in practice.

Education 301, English, Junior High School.....DR. MATTHEWS

3 hours a week for 18 weeks. Semester credit, 3 hours.

Attention is given to literature and language as experience and to situations in which communication plays a vital part. An attempt is made to show the place and value of "creative work" as a means of promoting skill and pleasure in communication. Students are given an opportunity to organize materials of instruction around centers of interest, and to understand learning problems through contact with the laboratory school. The principles underlying literature and language are thus developed in their functional relationships. Emphasis is placed on the self-improvement of each student in oral and in written communication.

Education 402, History.....DR. THOMAS

2 hours a week for 18 weeks. Semester credit, 2 hours.

The major objective of this course is to assist the student in the organization, interpretation, and evaluation of his professional experiences in the light of the origin and development of organized education.

Education 403, Children's Literature.....DR. MATTHEWS

3 hours a week for 18 weeks. Semester credit, 3 hours.

This course is designed to arouse and satisfy a genuine interest in children's books apart from school textbooks, to aid the student to obtain a better working knowledge of this literature, and to increase his awareness of degrees of excellence in content and form.

Education 404, Psychology.....DR. CARUTHERS

3 hours a week for 18 weeks. Semester credit, 3 hours.

The study of educational psychology is directed toward understanding, predicting, and influencing the behavior of normal human beings. It builds upon the more general principles and theories derived from biology and general psychology, and seeks to make practical use of them in meeting the problems of education. More specifically, it attempts to provide bases for evaluating and making use of the maturation changes —mental, physical, emotional—which affect the educative process; the learning process, as normal for the individual and as it may be affected by environment and understanding guidance; and the growth and maintenance of healthy personality by both pupil and teacher.

Education 405, Reading Disabilities*.....DR. MATTHEWS

2-3 hours a week for 18 weeks. Semester credit, 2-3 hours.

This course includes a study of the analysis and the correction of the common reading disabilities. The program of work includes: points of view regarding retardation; factors underlying the causes of reading difficulties; the relation of reading to growth; the mechanics of reading materials; and programs of correction in a laboratory situation.

Education 406, Audio-Visual Education.....DR. MATTHEWS

2-3 hours a week for 18 weeks. Semester credit, 2-3 hours.

The philosophy underlying the use of audio-visual aids in modern classroom procedures forms the approach to this course. Types of aids and their relation to units of work in the elementary school curriculum are considered in a practical way.

* Pending approval.

Education 408, Music in the Elementary and Junior High School
MISS WATTERS

2-3 hours a week for 18 weeks. Semester credit, 2-3 hours.

A course in the methods of teaching music in the grades, including junior high school. An analysis is made of the graded music program for elementary and junior high schools and objectives in teaching music are set up. Teaching songs and the rudiments of music, training the rhythm band, engaging in eurythmics and creative work, and other aspects of the music curriculum are observed and practiced in the Laboratory School. Prerequisite, Music 102, 201.

English

English 101-102, Composition and Contemporary Literature.....DR. MAY

3 hours a week for 36 weeks. Semester credit, 6 hours.

This course utilizes the close relationship among reading, talking, and writing and is designed to give the student an understanding of principles of composition as illustrated by contemporary writers. English activities involving both oral and written expression provide opportunity for application of those principles. Excellent models of many types and forms of writing are studied, including: novel, biography, play, short story, poetry, and essay. Attention is given to improving techniques of reading.

English 103, 104, 203, or 204, Speech.....MRS. BENNETT

3 hours a week for 18 weeks. Semester credit, 3 hours.

This course affords the student an opportunity to develop skill and poise in the oral presentation of thought. Each student delivers speeches before an audience of his fellows, and receives criticism upon his ability to analyze his subject, to select and arrange his ideas, to secure the interest and consent of his hearers, and to speak with simplicity, clarity, and correctness. Emphasis is placed upon pronunciation, enunciation, voice, phrasing, posture, platform manners, parliamentary procedure, and the organization of panel and other forms of group discussion. Individual oral interpretation of various selections from literature is required.

English 201, English Literature.....MRS. BENNETT

3 hours a week for 18 weeks. Semester credit, 3 hours.

In this course English literary history is presented through a detailed study of representative writings of great writers. Materials from Beowulf through Sheridan and from the Romantics through Thomas Hardy are included. Attention is given to types of literature and also to dominant continuing and recurrent trends in subject matter, movements, techniques, and social and literary philosophies.

English 202, American Literature.....MRS. BENNETT

3 hours a week for 18 weeks. Semester credit, 3 hours.

Special attention is given to the backgrounds that have made American literature a distinct growth. Types and ideas are stressed. Consideration is given to divergent movements and writers from the pre-Revolutionary papers of John Smith through contemporary materials by such authors as Steinbeck, MacLeish, and O'Neill.

English 204 or 205, World Literature.....MRS. BENNETT

2-3 hours a week for 18 weeks. Semester credit, 2-3 hours.

This course is intended to give a background for the study of English literature. It is a survey of European literary masterpieces from the earliest times to the present day. Intensive study is made of the *Iliad*, the *Odyssey* and of the plays of Aeschylus, Sophocles, Euripides and Aristophanes. Lyric poetry of Greece, Rome, and of modern continental countries is studied. The course is intended to bring students into touch with the masterpieces of world literature and with the conditions which produced them in order that they may read with better understanding their own literature.

English 402, Modern Comparative Drama.....MRS. BENNETT

3 hours a week for 18 weeks. Semester credit, 3 hours.

This is a study of European and American dramatists from Ibsen to O'Neill. The purpose of this course is to acquaint the student with the rise of the drama of ideas, to help him trace the modern movements of naturalism, symbolism, and expressionism, and to study the influences of one national drama upon another and to compare their techniques.

English 403, The Novel.....MRS. BENNETT

2-3 hours a week for 18 weeks. Semester credit, 2-3 hours.

The novel is a course in the critical and historical study of the growth and development of the English novel from its beginnings in the work of Defoe, Richardson, Fielding, and other major authors, to the modern novel. Emphasis is placed upon the types and techniques. Consideration of the novels as interpretations of human life and of political, social, and scientific movements is stressed. Investigation of modern attitudes and tendencies in fiction is also emphasized.

English 404, Play Production.....MRS. BENNETT

2-3 hours a week for 18 weeks. Semester credit, 2-3 hours.

A study of the fundamental principles of the production of plays. Actual practice is given in directing, in designing and selecting costumes, in arranging and designing sets, lighting, in casting, in rehearsal methods, and in the art of make-up.

Prerequisite or corequisite, Speech 103.

English 405, Shakespeare.....MRS. BENNETT

2-3 hours a week for 18 weeks. Semester credit, 2-3 hours.

This course is an intensive study of selected plays of Shakespeare with special attention to matters of textual criticism, characterization, dramatic technique, and of the biographical, literary, and theatrical background of the author's work.

Mathematics

Mathematics 101, College Algebra.....MISS RUSSELL

3 hours a week for 18 weeks. Semester credit, 3 hours.

Prerequisite, completion of high school algebra.

Fundamental operations, variation, functions and graphs, quadratic equations, binominal theorem, progressions, complex numbers, theory of equations, permutations and combinations, probability, determinants.

Mathematics 102, Trigonometry.....MISS RUSSELL

3 hours a week for 18 weeks. Semester credit, 3 hours.

Prerequisite, Mathematics 101 or concurrent enrollment in Mathematics 101.

Trigonometric functions, variation and graphs of functions, logarithms, trigonometric identities and equations, solution of triangles, the radian, polar coordinates.

Mathematics 103, General.....MISS RUSSELL

3 hours a week for 18 weeks. Semester credit, 3 hours.

The course is centered around the development of the concept of functions. The subject matter deals with algebraic functions, including linear, quadratic and functions of higher degree, the rate of change of a function and functions changing at a given rate.

Mathematics 104, General.....MISS RUSSELL

3 hours a week for 18 weeks. Semester credit, 3 hours.

A continuation of Mathematics 103 in which the student is introduced to the trigonometric functions and their application in solving right triangles and oblique triangles. Selected topics from elementary analytic geometry are also included. Special attention is given to the practical uses of the principles involved by applying them to the solution of problems from the sciences and the student's environment.

Mathematics 201, Analytic Geometry.....MISS RUSSELL

4 hours a week for 18 weeks. Semester credit, 4 hours.

Prerequisite, Mathematics 101 and 102.

Coordinates, the straight line and circle, graphs, transformation of coordinates, conic sections, parametric equations, transcendental equations, solid analytic geometry.

Mathematics 202, Differential Calculus.....MISS RUSSELL

3 hours a week for 18 weeks. Semester credit, 3 hours.

Prerequisite, Mathematics 205.

Variables, functions and limits, differentiation, applications of the derivative, maxima and minima, curve sketching, rates and curvature—differentials.

Mathematics 402, General Mathematics (Applied).....DR. CARUTHERS

3 hours a week for 18 weeks. Semester credit, 3 hours.

This course acquaints the student with the mathematics basic to an understanding of the nature and function of a number system. The topics considered include: origin of the number; structure of a positional number system; development of the fundamental operations; nature of reasoning in mathematics; mathematical symbolism; linear equations; approximate numbers; methods for organizing and describing quantitative data.

Mathematics 404, Social and Commercial Uses*.....MISS RUSSELL

3 hours a week for 18 weeks. Semester credit, 3 hours.

* Approval Pending.

Approximate computation, use of the slide rule, graphs and scale drawing, percentage, simple and compound interest, consumer credit and installment buying, savings and investment, mortgages, taxation, insurance and budgeting.

Music

Music 102, Fundamentals.....MISS WATTERS

3 hours a week for 18 weeks. Semester credit, 3 hours.

This is a basic course designed to develop the musical skills necessary for teaching music in the elementary school. It includes the correct use of the singing voice; elementary eurythmics; elementary theory—including the major and minor modes, keys and meters used in simple songs; tonal and rhythmic notation, elementary song form; ear training and keyboard harmony as a basis for simple accompaniments.

Music 201, Literature.....MISS WATTERS

3 hours a week for 18 weeks. Semester credit, 3 hours.

This is a survey course in music literature which aims to build a background for the understanding of music as part of life today. The elements of music—rhythm, melody, and harmony—together with tone color and form, are discussed, and their significance in various compositions is illustrated. Types of the world's music are studied, including the following: folk songs of the nations—American folk songs—with illustrations of the influence of national folk idiom on composed music; art songs; the polyphonic style as it culminated in the works of Palestrina and Bach; the opera and the oratorio; the symphony; and the symphonic poem. They are considered in their historical and social settings. The voice and orchestral instruments are studied as agents of expression.

Music 202, Current.....MISS WATTERS

2-3 hours a week for 18 weeks. Semester credit, 2-3 hours.

In this course a study of the trends in contemporary music is made. The approach is primarily appreciative, but historical data is employed in order to draw comparisons with earlier idioms and ideologies. The influence of jazz on the modern music is discussed. Opportunity is offered for each student to pursue special studies in music.

Music 302, Creative.....MISS WATTERS

2-3 hours a week for 18 weeks. Semester credit, 2-3 hours.

This course is designed for students particularly interested in the creative aspects of music. A study of melodic pattern is made, and original work is done by each student in setting words to familiar tunes, writing melodies for simple poems, and creating original songs, both words and music. Opportunity is offered for observation and experimentation in motivating creative music in the elementary school.

Music 401, Community Singing.....MISS WATTERS

2-3 hours a week for 18 weeks. Semester credit, 2-3 hours.

In community singing principles of conducting and the place of music as a factor in community living are emphasized. A repertoire of songs suitable for community singing in schools, clubs and public meetings is built up through study of available public publications and class participation in building and conducting typical programs.

Music 403, History.....MISS WATTERS

2-3 hours a week for 18 weeks. Semester credit, 2-3 hours.

The course in the history of music traces the development of music from the earliest times to the present. Changing theories of form and composition are studied. Major composers of the various periods are studied as being exemplar of outstanding schools of music.

Music 103, 204, 301, 404, College Chorus.....MISS WATTERS

1 hour a week for 36 weeks. Semester credit, 1 hour.

The purpose of the College Chorus is to give any student interested in singing the opportunity to enjoy choral music; to develop musical ability, appreciation and taste; and to represent the college by performing as a whole or in small groups for civic and social gatherings in local and nearby communities, as well as in broadcasts and school assemblies, concerts, or other student and alumni affairs.

The College Chorus has a three-fold organization: Women's Glee Club, Men's Glee Club, and the combined choruses, known as the College Chorus. Smaller singing units are formed among the better singers.

Music 203, Recreational Music (Proposed).....MISS WATTERS

2-3 hours a week for 18 weeks. Semester credit, 2-3 hours.

This is designed to include such elementary techniques of voice production, directing of group singing, and selection of material as will be of value to a recreational director. A compilation of song material will be made for general purposes, camps, Scouting and similar organizations. Practice will be offered in creative writing to provide original songs.

Philosophy and Psychology

Philosophy 202, Introductory.....DR. MAY

3 hours a week for 18 weeks. Semester credit, 3 hours.

This course surveys seven of the major problems of philosophy and at the same time examines present problems and practices of these major problems. The chief approach and the dominant guiding principle of the course is not that these historical persistent problems all have a contribution to make to problems of the present, but rather it is regarded that the historical development of human thought is to be observed in the attempted solutions of these problems. It is the chief aim of the course to direct the consideration of the best thought of the best thinkers so that it will result in bringing to the student a deeper, broader, and more significant view of his life in the environment in which he is to live.

Health Education 106, First Aid and Accident Prevention....MISS JAMART

2 hours a week for 9 weeks. Semester credit, 1 hour.

To acquire knowledge and skills for the emergency care of the injured, and to create an active interest in the prevention of accidents through the elimination of causes. This course meets the requirements of The American Red Cross First Aid Courses. The Certificate earned remains valid for three years.

Hygiene 302, Mental, Personal and Social
DR. CARUTHERS, MISS JAMART AND MR. FLEMING

3 hours a week for 18 weeks. Semester credit, 3 hours.

This course is cast into three areas, namely, mental hygiene, or individual psychology, personal hygiene and social hygiene. Its chief aim is to develop a consciousness on the part of the student for the three-fold basis of healthful and happy living.

a. Mental hygiene will be based largely on individual psychology. Its main emphasis will be on the mental health of the normal individual with the purpose of making psychiatric treatment unnecessary. The course may thus be considered as preventive psychiatry. Principles of mental health will be developed and applied.

b. This course approaches the problems of individual health, through an analysis of the various forces that play upon the human organism. Emphasis is given to factors in personality, various responses to the problems of health, and application of scientific fact and principles of living.

c. The area of social hygiene is concerned with the problem of adjustment on the part of the individual to group living. Premarital, marital and domestic problems are among those considered.

Psychology 201, General.....DR. MAY

3 hours a week for 18 weeks. Semester credit, 3 hours.

The major objective of this course is to develop a definite fundamental analysis of human nature from the viewpoint of man's native equipment and original tendencies. Emphasis is placed upon the interrelationship of mental activity and functional physical activity. With this in view, such topics as sensations, feelings, emotions, desires, and habit formation are studied. To give the student perspective, a survey of the different schools of psychology is made.

Psychology 202, Social.....DR. MAY

2-3 hours a week for 18 weeks. Semester credit, 2-3 hours.

In contrast to individual psychology, which considers human problems primarily from inner characteristics both native and acquired, social psychology gives major consideration to overt behavior as expressed in group situations. Emphasis is placed on the relation of the individual to the group, mass reaction and judgment, the principles of group control, and the social significance of the individual abilities and characteristics. The chief aim of the course is to enable the student to interpret social phenomena and to realize the impact of such on his own personality.

Psychology 203, Nurses.....DR. MAY

2 hours a week for 18 weeks. Semester credit, 2 hours.

This is an introductory course in psychology especially organized for student nurses. The point of reference is regularly that of the student and practicing nurse and the environment in which their profession places them. Particular emphasis is given to problems dealing with physical, mental, and personality deviates.

Psychology 204, Applied.....DR. MAY

3 hours a week for 18 weeks. Semester credit, 3 hours.

This course makes application of research findings in psychology to

problems encountered in everyday life. Problems in business, industry, advertising, labor-management, the professions, and social relations are given special consideration.

Physical and Health Education

Physical Education 101-102, 201-202, 301-302
MISS JAMART AND MR. MAGGS

2 hours a week for 36 weeks. Semester credits, 2 hours each.

These courses provide an introduction to physical education activities and are planned to give the student a foundation for intelligent use of those activities, and for a systematic approach to other and more advanced activities. The courses should help the student to develop and maintain physical fitness; to develop personal ability in the fundamental skills and understanding of them; to develop game habits and understandings; to develop a method of learning skills and physical education activities; and to build a repertoire of physical education activities which he will use in teaching.

Health Education 104 or 202, Personal Hygiene
MISS JAMART AND MR. MAGGS

3 hours a week for 18 weeks. Semester credit, 3 hours.

This course attempts to help the student gain knowledge of the elements of anatomy and physiology which serve as a basis for understanding individual health practices; to recognize particularly his own health problems and those common to individuals of his age; and to prepare himself through knowledge of the structure and function of various tissues for the study of psychology and other courses in health education.

Health Education 103N, Massage and Physical Therapy.....MISS JAMART

1 hour a week for 18 weeks. Semester credit, 1 hour.

This course is designed for students in the field of nursing, prenursing and physical education. Emphasis is given to remedial exercises in medical and surgical conditions.

Nutrition 202.....DIETITIAN

2 hours a week for 18 weeks. Semester credit, 1 hour.

This course is planned so that the student may have a better knowledge of the needs for health and growth of youth.

Physical Education 301-302.....MISS JAMART AND MR. MAGGS

2 hours a week for 36 weeks. Semester credit, 2 hours.

These courses outline the aims of Physical Education and give a brief history of Physical Education in the United States. Activities are planned to give the student actual practice for teaching. Subject matter is outlined for the elementary and junior high school. The material presented includes games for the playground and classroom, self-testing and rhythmic activities, posture and dramatic training.

Physical Education 303, Supervision of Games and Playground*
MISS JAMART AND MR. MAGGS

3 hours a week for 36 weeks. Semester credit, 3 hours.

* Pending approval.

Methods and materials of teaching Physical Education in the elementary and junior high school. A graded program of study for elementary and junior high schools. Standards of achievement, and techniques for evaluation are developed. Special attention is given to methods of teaching the activities selected through discussion, laboratory practice and observation.

Physical Education 105-106, 205-206, 305-306, 405-406, Corrective
MISS JAMART

2 hours a week for 36 weeks. Semester credit, 2 hours.

These courses deal with the organization of programs and services in individual corrective work in different type situations. Students not admitted to Physical Education classes because of remedial defects may enroll.

Health Education 202, Health of School Children
MISS JAMART AND MR. MAGGS

3 hours a week for 18 weeks. Semester credit, 3 hours.

The course aims to acquaint students with the health needs of pupils and to prepare them to deal intelligently with common situations involving the health of pupils. The course covers the relation to the health of the school child of such environmental factors as sanitation of the school plant and the ventilation and lighting of school rooms; the importance of the services of public health clinics and of close cooperation with the school physician and nurse, knowledge of the defects and diseases, communicable and non-communicable, frequently found among children of school age, methods of preventing some of the common infectious diseases, and practice in interpreting the medical records of pupils; the need for a well-balanced program of studies and physical activity during the school day; some understanding of the principles underlying health education in the elementary school and the selection of materials and methods appropriate for such teaching.

Physical Education 401-402.....MISS JAMART AND MR. MAGGS

2 hours a week for 36 weeks. Semester credit, 2 hours.

These courses are a continuation of Physical Education 301-302. The chief topics are: play and what it means to the child; importance of organized play in school; organized games; athletics and social games; stunts and efficiency tests; track and field events; folk dancing; physical education as outlined for the State of Maryland; how to conduct a meet; how to conduct tournaments; good sportsmanship.

Physical Education 402, Folk Dancing and Sports
MISS JAMART AND MR. MAGGS

2 hours a week for 18 weeks. Semester credit, 2 hours.

This course is sufficiently extensive to give the student a rich repertoire of dances of different nations. Progression for teaching the step combinations such as two-step, polka, waltz, and schottische will be presented and discussed. Provision will be made for the collection of background material for the presentation of folk dances. The course will include a study of natural charteristics, folk costumes, and a brief history of the dancing of each country as it is considered.

ROMANCE LANGUAGES

French 101 and 102, Elementary French.....MISS FRANCIS

3 hours a week for 36 weeks. Semester credit, 6 hours.

French 101 and 102 are designed as the beginning course in French. They are open to students who have never studied French and to students who have had one or two years of high school French, but who need review before taking advanced courses.

The two semesters cover basic French grammar and pronunciation. A foundation for reading, writing, and speaking non-technical French is built, and as rapidly as possible French becomes the language of the classroom. Throughout the year an interest is maintained in current affairs of France, and during the second semester a rudimentary study is made of the culture of France.

French 201 and 202, Intermediate.....MISS FRANCIS

3 hours a week for 36 weeks. Semester credit, 6 hours.

French 201 and 202 constitute a review of French grammar with the introduction of new grammatical niceties and additional idioms. A survey of classical and modern French literature is used as basic reading.

Prerequisites: French 101 and 102 or two years high school French with an average of B.

Spanish 101 and 102, Elementary Spanish.....MISS FRANCIS

3 hours a week for 36 weeks. Semester credit, 6 hours.

Spanish 101 and 102 are a beginning study of the Spanish language. The year's work covers the fundamentals of the Spanish language and the fundamentals of Spanish grammar and pronunciation. The student's three-fold objective is to read, write, and speak good non-technical Spanish with as facile use of idioms as possible in a year's study. Opportunity is given for frequent oral and written composition. A current interest is maintained in the culture of Spain and the most recent developments in current affairs.

Spanish 201 and 202, Intermediate.....MISS FRANCIS

3 hours a week for 36 weeks. Semester credit, 6 hours.

Spanish 201 and 202 include a review of Spanish grammar with the introduction of new rules and idioms. During the first semester, short stories from Spanish literature are read; during the second semester Cervantes' DON QUIXOTE is the major reading assignment with short selections from recent Spanish literature as supplementary material.

Prerequisites: Spanish 101 and 102 or two years high school Spanish with an average of B.

Science

Anatomy 101, Physiology.....DR. FLEMING

2 hours lecture and 2 double laboratory periods a week. Semester credit, 4 hours.

Study of the structure and function of the various cells, tissues, organs and systems of the human body, with emphasis on their integration in the formation of the human organism. Provides a course espe-

cially designed for student nurses and pre-nurses, and is therefore also suitable for others who intend to major in some branch of the biological sciences. Instruction involves lecture, demonstration, discussion and laboratory work. Use is made of a human skeleton, a model of the human torso, and of the preserved cat, together with other laboratory materials. All study is directed toward a better understanding of the human body and how normal functioning can best be maintained.

Science 101-102, Biological.....DR. FLEMING

2 lectures and 1 double laboratory period a week for 36 weeks. Credit, 6 hours.

Development of correct knowledges, understandings and generalizations as to man's place in the living world of plants and animals. Special emphasis is given to applications of biology to the problems of life in general and particularly to those problems of child growth and development to which biological science can make a definite contribution. Instruction includes lectures, demonstrations and discussions together with laboratory work and field study. Provides the biological subject matter needed by the student who is to teach in the elementary or junior high school.

*Biology 202, Human**.....DR. FLEMING

1-2 hours a week for 18 weeks. Semester credit, 1-2 hours.

Lecture demonstrations and discussion of the growth and development of the human body. Special emphasis is placed upon developing desirable understandings as to the biological basis of human behavior. Consideration is given to the individual through embryology, the infant period, early childhood, the school years, and adulthood. Especially designed to provide persons who are to work with children with a better comprehension of the biological forces which tend to cause the individual to grow, develop and behave as he does.

Zoology 101, General.....DR. FLEMING

2 lectures and 2 double laboratory periods a week for 18 weeks. Semester credit, 4 hours.

The aim of this course is to acquaint the student with the general biological principles through the study of the anatomy and physiology of the representatives of the animal kingdom. It is designed to provide a cultural background as well as a foundation for courses in psychology and sociology. The student is also made acquainted with the relationship of the biological sciences and the general application of the principles developed in the study of zoology.

Botany 102, General.....DR. FLEMING

2 lectures and 2 double laboratory periods a week for 18 weeks. Semester credit, 4 hours.

This course consists of the study of the relationship of the plant groups and also of the anatomy and physiology of the seed plants. The chief aim is to present the fundamental biological principles of plant life and to provide a cultural background for the student. The nature and aim of the biological sciences, their methods, and the value of their results are also presented.

Zoology 203, Field.....DR. FLEMING

1 lecture and 1 three-hour laboratory period a week for 18 weeks. Semester credit, 2 hours.

* Pending approval.

The purpose of this course is to study the relation of animal life to the environment. In addition, the student will study the behavior and identification of the common insects, birds, mammals, etc. Some attention will be given to the care of animals in the class room. Prerequisite, Science 101-102 or Zoology 101.

Botany 204, Field.....DR. FLEMING

1 lecture and 1 three-hour laboratory period a week for 18 weeks. Semester credit, 2 hours.

This course is designed to acquaint the student with plants in their natural habitat and the factors affecting their growth. Practice will be provided in the identification of representatives of the divisions of the plant kingdom. Special attention will be given to the identification of wild flowers, trees, and shrubs.

Science 201-202, Physical.....MR. GLENN

2 lectures and 1 double laboratory period a week for 36 weeks. Semester credit, 6 hours.

These courses are designed to give a broad acquaintance with the various fields of the physical sciences. Their primary aims are to increase awareness of physical phenomena and to show how the understanding and interpretation of these phenomena contribute to our living. Their materials are selected from the fields of astronomy, earth sciences, physics, and chemistry. They cut across the boundaries of these fields, in order to bring out their relationships and to provide a background for the appreciation of the cooperative nature of the scientific advances of today.

Chemistry 101, General.....MR. GLENN

2 lectures and 2 three-hour laboratory periods a week for 18 weeks. Semester credit, 4 hours.

This course deals with the subject matter usually included in general chemistry. It is organized on a basis of the broad principles of the subject rather than a detailed description of the elements. The principles studied are extensively illustrated with descriptive matter which in this course deals chiefly with the characteristics of the non-metals. The laboratory experiments are selected to give the student practice in the application of the principles. Quantitative relationships are stressed in the laboratory work.

Chemistry 102, General.....MR. GLENN

2 hours lecture and 2 three-hour laboratory periods a week. Semester credit, 4 hours.

This is a continuation of Chemistry 101. The course continues to deal with principles, and industrial applications rather than pure descriptive matter. This course includes a study of the characteristics of the metals. The compounds of carbon with their application to nutrition and the field of synthetic chemicals are given special attention. An introduction to systematic qualitative analysis is included.

*Chemistry 103N, including Micro-Biology**.....MR. GLENN

2 lectures and 2 two-hour laboratory periods for 18 weeks. Semester credit, 4 hours.

This course deals with selected elementary principles of inorganic,

* Pending approval.

organic, physiological chemistry and microbiology. Both the lectures and laboratory are organized to aid the student in developing understandings, which are applicable to nursing, rather than to train technicians. The course is intended primarily for nurses in training, and for students enrolled in the pre-nursing curriculum.

*Chemistry 105, General**.....MR. GLENN

2 lectures and 2 two-hour laboratory periods a week for 18 weeks. Semester credit, 3 hours.

A course similar in content to Chemistry 101, but placing more emphasis on the application of the ten fundamental principles and less on advanced theory. It is organized to meet the needs of students in general education, industrial arts, nursing, home economics, and physical education.

*Chemistry 106, General**.....MR. GLENN

2 lectures and 2 two-hour laboratory periods a week for 18 weeks. Semester credit, 3 hours.

This course is a continuation of Chemistry 105. In addition to the industrial application and metallurgy of the most common metals, special emphasis is placed on elementary physiological Chemistry.

*Chemistry 201, Organic**.....MR. GLENN

2 lectures and 2 three-hour laboratory periods for 18 weeks. Semester credit, 4 hours.

This course is a systematic study of the aliphatic carbon compounds. The general principles of organic chemistry are stressed as well as the descriptive material. Special attention is given to the industrial and medicinal application of these compounds. The course is organized to meet the needs of pre-medical and pre-dental students as well as chemistry majors.

*Chemistry 202, Organic**.....MR. GLENN

2 lectures and 2 three-hour laboratory periods for 18 weeks. Semester credit, 4 hours.

This is a continuation of Chemistry 201. It deals with the aromatic and heterocyclic compounds.

Physics 201, General.....MR. GLENN

3 hours lecture and 1 three-hour laboratory period a week. Semester credit, 4 hours.

This course includes subject matter dealing with heat and the mechanics of solids, liquids, and gases. The course is arranged and presented to give the student insight into the use and development of the important physical laws and theories. Both the lecture and laboratory work are closely correlated to situations found in the student's environment.

Physics 202, General.....MR. GLENN

3 hours lecture and 1 three-hour laboratory period a week. Semester credit, 4 hours.

This is a continuation of Physics 201 and deals with magnetism, electricity, light, and sound.

* Pending approval.

Social Sciences

Economics 201, Principles.....MR. FLEMING

3 hours a week for 18 weeks. Semester credit, 3 hours.

This course begins with a general survey of our industrial society, emphasizing the development and characteristics of modern capitalistic organization. It continues with a study of the fundamental principles involved in the consumption, production, exchange, and distribution of wealth. Special attention is given to economic laws and their application to modern problems. A brief comparison is made of the economic order in America with that in Russia, Germany, Italy, and other countries.

Economics 202, Applied.....MR. FLEMING

3 hours a week for 18 weeks. Semester credit, 3 hours.

This is an intensive study of modern economic problems in the light of principles developed in Economics 201. Some of the problems included in the course are those growing out of the risks in the industrial enterprise, banking, international trade, the relations between labor and capital, the concentration of the control of industry, the plight of agriculture, and the programs of social reform such as liberalism, socialism, and fascism. Each student is expected to make a thorough study of a current economic problem and to report his findings to the class. Extensive use is made of current periodicals. Most of the class periods are devoted to round-table discussions of the materials found in the textbooks and magazine articles. Prerequisite, Economics 201.

Economics 401, Conservation of National Resources.....MR. FLEMING

2-3 hours a week for 18 weeks. Semester credit, 2-3 hours.

The course deals with the vital problems of the conservation of soils, minerals, forests, wild life and inland waters resources. Local applications will be stressed with field trips.

Economics 402, Consumer.....MR. FLEMING

2-3 hours a week for 18 weeks. Semester credit, 2-3 hours.

The course is concerned with a study of consumer problems, the theory of consumer choice, aggregate consumption and the level of employment. Local applications will be made.

Geography 301, Principles.....MISS PURNELL
Geography 302, Economic.....MR. FLEMING

3 hours a week for 36 weeks. Semester credits, 6 hours.

These courses comprise a study of the factors of the natural environment, their interactions, and their appraisal and utilization by man to satisfy his needs. They aim to build an appreciation of the types of civilization which have developed in different environments and of the ways in which the natural balance can be disturbed through the productive and exploitive activities of mankind. A study of the earth as a whole and in its relation to other bodies in the solar system forms an integral part of the course. A thorough study of the diverse regions of the world is made, with emphasis on the interrelationships between plant, animal, and human life and the natural environment. Map reading and interpretation are stressed as tools of geographical thinking and expression.

Government 201, National.....MR. FLEMING

3 hours a week for 18 weeks. Semester credit, 3 hours.

This course will serve as an orientation course for those who wish to do advanced work in the field of political science. The subject matter deals with the origins of American political institutions, the dynamics of constitutional development, the federal system with its traditional checks and balances, the functions and processes of government, political parties, and the adjustment of the American democracy to a changing social order. Frequent contrasts and comparisons are made between our government and that of other countries.

History 101-102, Europe.....DR. THOMAS

3 hours a week for 36 weeks. Semester credit, 6 hours.

These courses trace the development of European man as a social being, from the establishment of the Greek City to the present time. Consideration will be given Europe's debt to the ancient Oriental civilizations of Egypt with particular emphasis upon social, economic, and political phases of Western life.

History 201-202, United States.....DR. THOMAS

3 hours a week for 36 weeks. Semester credit, 6 hours.

These courses offer a comprehensive survey of the political, economic, social, and cultural forces which have shaped the pattern of life in the United States. Sources of particular problems are uncovered and the present status of these problems is viewed in the light of their historical development. Special emphasis is placed upon the origins and development of American democracy.

History 402, International Relations.....DR. THOMAS

2-3 hours a week for 18 weeks. Semester credit, 2-3 hours.

The course uses United States international relations as its core, stressing recent events. It discusses United States foreign policy from its beginnings but pays particular attention to world events of the twentieth century. It is assumed that the student possesses a fair knowledge of the political and social history of the United States and of Europe. A carefully documented research paper is an integral part of the class work.

History and Geography 304, Maryland.....DR. THOMAS

2-3 hours a week for 18 weeks. Semester credit, 2-3 hours.

This course is planned to acquaint the Maryland teacher with the historic background and geographic characteristics of his own State. Appropriate texts in both the history and the geography of the state will be made available in the library. Much individual research is done in the fields of local history and regional geography and industry.

Sociology 102, American Life.....MR. FLEMING

3 hours a week for 18 weeks. Semester credit, 3 hours.

This course consists of a general survey of the principles of social relationship and social program, change, and control illustrated by reference to problems of contemporary life.

Organizations

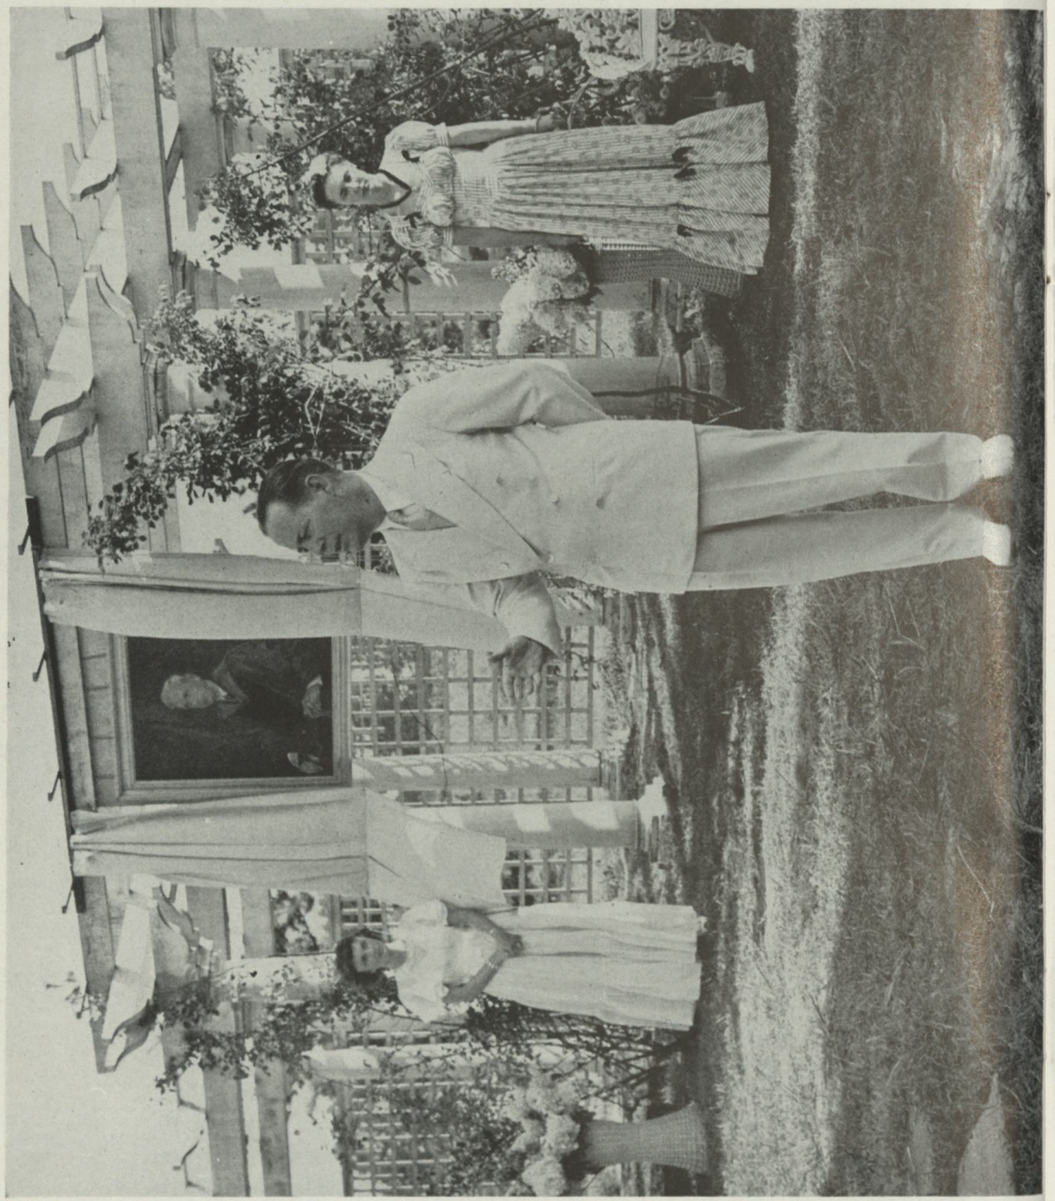
STUDENT GOVERNMENT

The purpose of the Student Government Association is to give the students a definite responsibility in governing themselves. This responsibility is ascribed to by each student. The Association is composed of all students. The officers are elected from and by the student body. The Executive Council is comprised of these officers, presidents of the respective organizations, and two faculty representatives, elected annually by the faculty.

Student Government

THE ALUMNI ASSOCIATION

The aim of this Association is to keep alive among members the professional ideas and the friendly contacts developed during their college years. Each year, graduates are inducted into the ranks of the Alumni by an impressive ceremony at sunset on the front steps the day before each Commencement. College Alumni Homecoming is held each fall, with a program planned by officers chosen from classes celebrating their 10th and 20th anniversaries.



Alumni Association

THE ATHLETIC ASSOCIATION

The Athletic Association consists of two branches, a men's association and a women's association. Each group has its own officers. The women's athletics in the school include field ball, hockey, and basketball. The girls also take part in the Athletic Exhibition, which is the major event. The men's athletics include three major sports: soccer, basketball, and baseball—and, in addition, tennis, softball, gym work, boxing, and wrestling. Each year intra-mural games are played in each of the three major sports. The Athletic Association sponsors a formal dance each year.

THE BAGLEAN-CARNEAN

The purpose of the Baglean-Carnean Debating Society is to provide an opportunity for free discussion of current problems. Through intramural and intercollegiate debating, the members are given an opportunity to develop their abilities to think and express themselves. Membership is open to all students. Meetings are held monthly.

THE COLLEGE CHORUS

Any person interested in singing may become a member of the College Chorus, which offers opportunity to enjoy choral singing and to develop musical talent, appreciation, and taste. The chorus is composed of the Women's Glee Club and the Men's Glee Club, which perform together, separately, or in small groups. These groups provide musical programs for the college functions and for civic and social organizations in Salisbury and in other Eastern Shore communities.

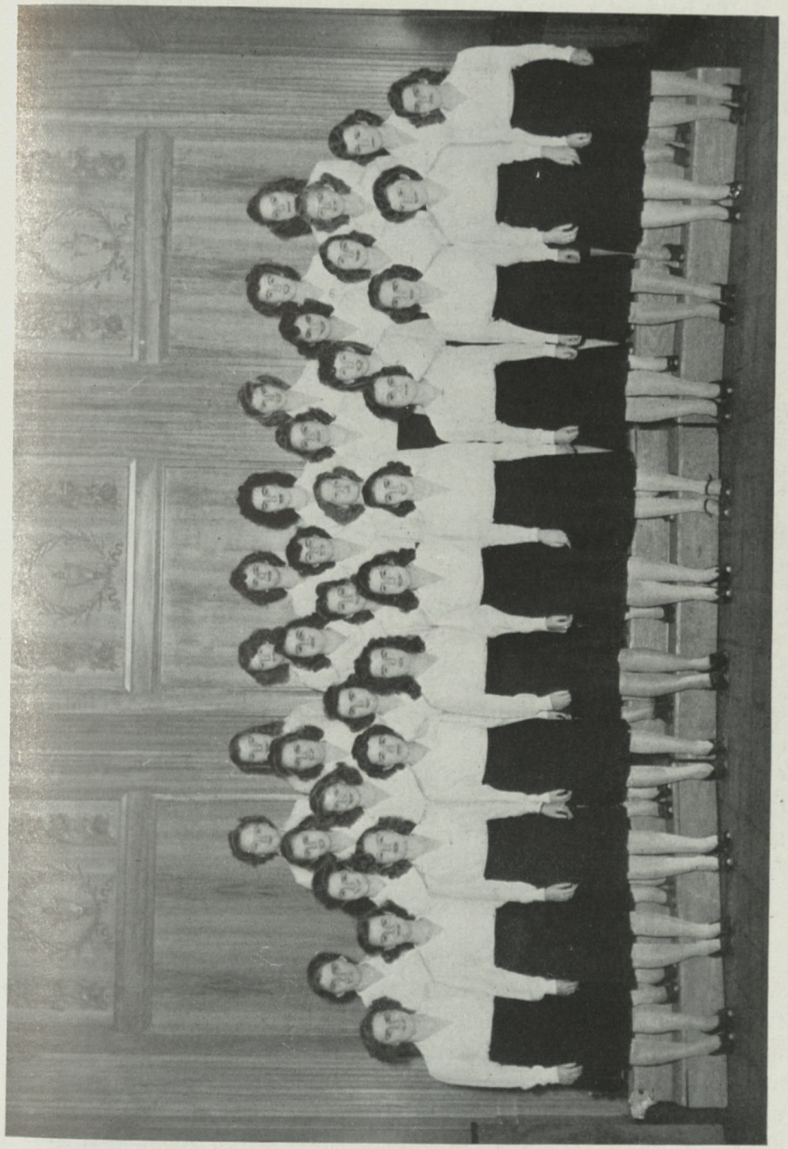
Athletic Association

Baglean-Carnean Society

THE CHRISTIAN ASSOCIATION

The Christian Association has charge of the religious activities of the school. Weekly vespers, planned and conducted by the students, are held on Sundays at six o'clock. The purpose of the association is to maintain a Christian and friendly atmosphere among the students.

Christian Association



College Chorus

THE COLLEGE BAND

To become a member of the band, the student need not be particularly skilled in the use of an instrument. With a few private lessons from the instructor, and upon reaching a suitable degree of proficiency, one may enter the band. The band plays for assembly programs and other school functions; in its repertoire are classic, semi-classic, semi-popular and band selections. College credit to the extent of one point a year is given each member.

THE HOME ASSOCIATION

The Home Association is an organization of girls living in the dormitory. The purpose of this organization is to set up and execute dormitory regulations, in cooperation with the Student Government Association, and to promote an harmonious and desirable atmosphere in dormitory life at the college. The relation of the Social Director to this group is one of friendly counsel and helpful guidance.

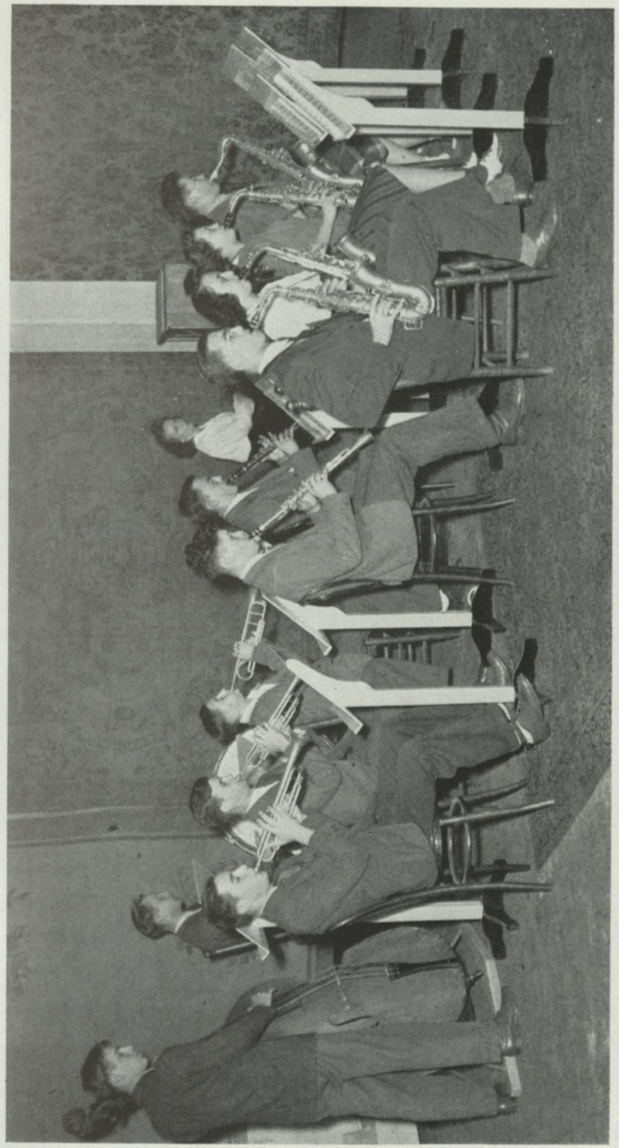
THE GIRLS' DAY ASSOCIATION

The Girls' Day Association is an organization of the commuting women students of the college. The primary aim of this association is to promote wider acquaintance and friendship among the faculty and student body. Special rooms, equipped with lockers for books and materials, racks for coats, day-beds, and lounges are provided such students. Each day student is responsible for keeping the room in good order.

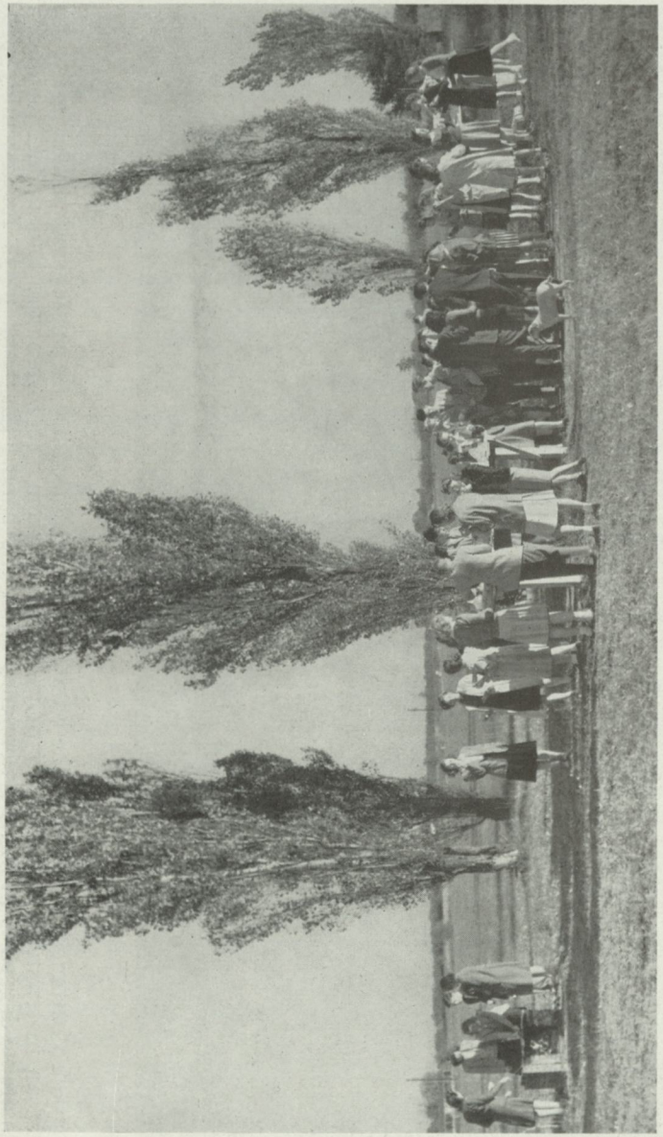
THE MEN'S ASSOCIATION

The Men's Association comprises all men of the college, who upon registration automatically become members. Its function is to promote the physical, social, and academic well-being of all men and to assist in the solution of any problems arising within the group. A reading room and a play room, each equipped with recreational facilities, have been made available to the group. The Men's Association plays a large part in moulding student morale and in sponsoring policies for the general welfare of the college.

THE COLLEGE BAND



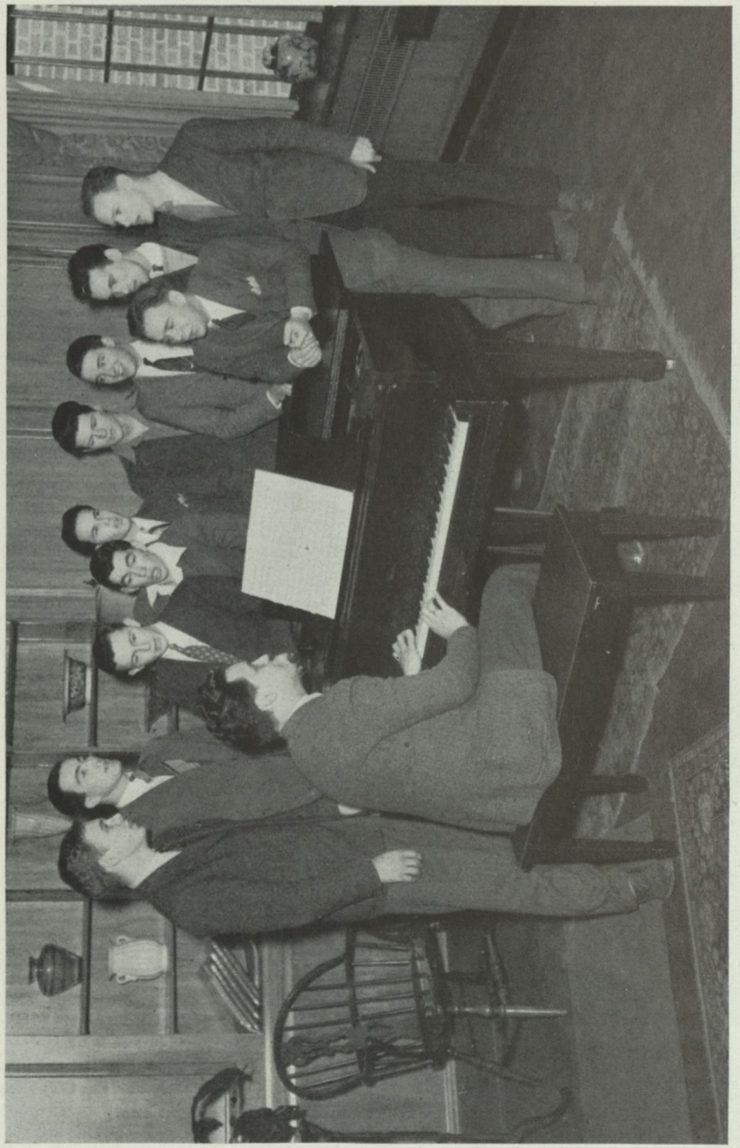
To become a member of the band, the student need not be particularly skilled in the use of an instrument. With a few private lessons from the instructor, and upon reaching a suitable degree of proficiency, one may enter the band. The band plays for assembly programs and other school functions; in its repertoire are classic, semi-classic, semi-popular and band selections. College credit to the extent of one point a year is given each member.



Home Association

Girls' Day Association

THE MEN'S ASSOCIATION



The Men's Association comprises all men of the college who upon registration automatically become members. Its function is to promote the physical, social, and academic well-being of all men and to assist in the solution of any problems arising within the group. A reading room and a play room, each equipped with recreational facilities, have been made available to the group. The Men's Association plays a large part in moulding student morale and in sponsoring policies for the general welfare of the college.

THE PUBLICATIONS STAFF

The oldest organization in the college is the Publications Staff. Through the years it has served as the medium through which the activities of the State Teachers College have been recorded and as the means of joint expression for the students and organizations in every phase of collegiate life. The college annual, "The Evergreen," a self-supported magazine, "The Holly Leaf," and a bi-monthly mimeographed newspaper are the products of the Staff. With the counsel of two faculty advisors, the Publications work is carried on by the editors and class reporters assisted by the business manager and a group of advertising solicitors. It is the aim of the Staff to provide a complete coverage of all the latest college news as well as to preserve a record of college life for the students and alumni in years to come.

THE FUTURE TEACHERS OF AMERICA

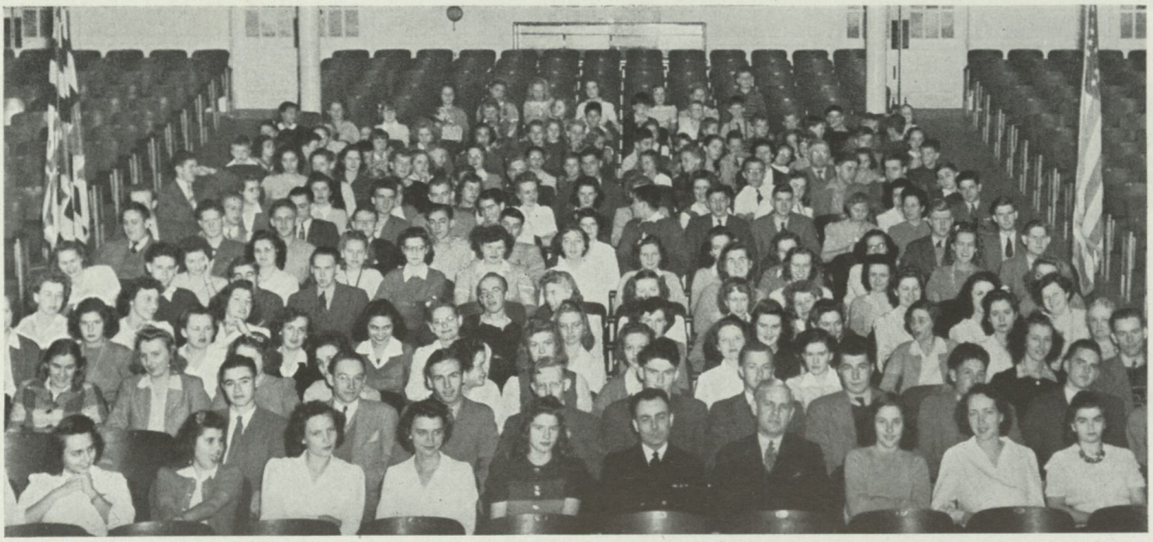
The Future Teachers of America is a national organization and is essentially a part of the National Educational Association. It affords an opportunity for persons who are preparing to be teachers to become affiliated with the national organization. A local chapter of The Future Teachers of America was organized by the members of both junior and senior classes during the school year of 1945-46. The local chapter is known as the Albert S. Cook Chapter of the Future Teachers of America. It meets once each month and its programs are made up of problems pertaining to education and the consideration of professional ethics.

Publications Staff

THE SOPHANES PLAYERS

The Sophanes Players, the dramatic organization of the State Teachers College, is one of the oldest clubs in the college. Each year it strives to produce a play of outstanding merit for the public, and a one-act play for the student assembly. Members are given opportunities to work with sets, make-up, costumes, and lights. Any student of the college may become a member.

THE STUDENT ASSEMBLY



Each week during the school year an assembly is held under the direction of three students and one faculty adviser. Some programs are taken over by the different organizations and by the classes, while others are arranged by the Assembly Committee. These assemblies give an opportunity for group singing and provide one means for uniting the student body.

THE CAMERA CLUB

The Camera Club aims to provide its members with the opportunity for creative expression in the field of photography, to further scientific study in this field, and to cooperate with the Publications Staff in securing "shots" of campus life for publication. Membership is open to anyone who is interested in photography.

THE COSMOPHONIC SOCIETY

The new Cosmophonic Society was organized by and for students interested in the world of music. Semi-monthly meetings give opportunity for students to hear and participate in programs of all types of music. Another aim of the club is to encourage student programs for college assembly periods and public recitals should the occasion be offered.

Different phases of music are stressed at the regular meetings, thus giving each member an opportunity to enjoy the type of music that most appeals to him.
